Jan - send the DR 3 data to the State guys. Let s talk tmrw about the Rico trip - go or not.

I will ask Steve A to give access.

Thanks,
Steve

Hi, Steve.

I guess we're not meant to talk. I just saw you must have called this morning while I was at the dentist, and when I just tried to call you your greeting said you're on travel. Could you look at the following items and let me know your thoughts.

1. Should I do oversight at Rico next week? Elliott's last visit was last week, so next week fits the every other week pattern. Last week the wetland system was somewhat behind schedule, the site road had not been moved, and the repository work was also behind schedule. Next week they should be finishing up the wetland, moving the road, and at least have started screening the soil being removed from the repository. I can confirm site activities with Chris Sanchez before traveling to the site if you prefer. Next week is good for me – I'd like to attend EPA's mining conference in ABQ the week of the 11th and have a short personal trip early the week of the 18th, though would be available to go to Rico late that week or late the week of the 11th.
2. If I don't hear otherwise from you by tomorrow morning I'll go ahead and send the DR-3 average daily flow data to the people on the cc list for the other flow data.
3. I spent a few hours looking at the Red & Bonita data again. The results are mixed, and definite conclusions about the comparison between older and newer data aren't there, mainly because the Cement Creek load is sometimes less than the sum of the loading from the 4 mines. We might have more to go on if I can get more of the current data. I only have the recent EPA data through August 2011 (the data came via a Bill Schroeder spreadsheet). Could you please request that I get a subscription to the Scribe data for the site? (I assume you could just ask Steve Auer at ESAT or Dan Wall to allow me access. Or you might have the official file name and password and could just send it.) It's fine if you want to drop this, though, just let me know.

Hope you have a good trip.

Jan
